ABSTRACTED-PUB-NO: AU 9466054A

BASIC-ABSTRACT:

The liquid applicator head comprises a body, a brush extending from the body and a valve assembly in the body to enable supply of liquid, wherein the brush means is associated with the valve assembly such that movement of the brush causes actuation of the valve assembly and consequent supply of liquid.

The valve assembly comprises a valve body a valve aperture in the valve body, a valve member adapted to close the valve aperture. There is a valve stem fastened to the valve member with the brush fastened to the valve stem where movement of the brush and hence of the valve stem causes the valve member to be lifted off the valve aperture to allow flow of liquid.

ADVANTAGE - The herbicide can be applied at lower concentrations.
